Summary

Full stack developer focusing on Python, JavaScript, and class oriented design. Problem solver with a passionate, self-motivated approach. Student Technology Mentor at the Oakland Library Technology Services with hands-on experience assisting students and staff with printers, scanners, phones, and laptops.

Education

Oakland University

Bachelor's Degree Computer Science, *3.60 GPA*
Minor in Applied Mathematics

Rochester, Michigan

Expected Graduation May 2026

Projects

Workout Assistant

Java application that walks users through workouts set by step. The application included an editable glossary and a calendar for tracking user progress and routines. Developed UI in JavaSwing and designed the framework of how the application would be laid out.

Blind Accessible Chess Game

Python application created with pygame that uses keyboard presses and text to speech to allow a user to play computer chess without sight. Included a GUI, player vs player mode, and player vs computer mode. Organized the project and developed piece movement and capturing. Documented each stage of the project and met with teammates weekly to discuss progress and troubleshoot issues.

Windows 98 Portfolio

An art portfolio website designed to mimic Windows 98. Included draggable windows for different webpages, draggable icons to open up windows, and a working taskbar. Created with JavaScript, HTML, and CSS.

Experience

Oakland Library Technology Services

Rochester, Michigan

Student Technology Mentor

December 2024 - Present

- Provide high-level overviews on computer operating systems and software functions.
- Troubleshoot software and hardware issues with personal laptops and smart phones.
- Manage printers and scanners to ensure proper function.
- Answer questions about how to use campus printers and scanners.
- Help students and guests download and update software.

The Oakland Post

Rochester, Michigan

Distribution Director

June 2023 - November 2024

- Overhauled the previous system left by former management to reduce waste and be more productive.
- Contacted organizations and building managers on campus to change newspaper stand locations to be more effective and collected data to determine new stand placement.
- Provided instruction to others and created routes and routines.

2nd & Charles

Utica, Michigan

Retail Associate

June 2022 - December 2022

- Researched and assessed the quality of customers buy-back items.
- Informed customers about discounts and special offers while answering questions about rarer items.
